

InfoQuest Systems, Providing Customized Electronic Health Records and Practice Management Software

Certificate # 01282011-5895-6

InfoCare EHR is designed around, and fully supports the criteria for “Meaningful Use”. Small to medium sized medical practices will find that InfoCare was designed around their specific needs and budget. Flexibility and scalability allows the system to grow as you grow your practice, adding additional physicians, support staff or even additional locations.

- Customized for the workflow of your office
- Optional integrated scheduling and billing software
- Accommodates point and click or free text chart notations
- Dashboard view of the entire patient chart includes progress note, labs and medications
- e-Prescribing allows you to electronically submit your patient's prescriptions, check formulary availability, drug-to-drug interactions, and contraindications
- Meaningful Use Calculator automatically calculates all required values tied to Meaningful Use, giving you a real-time status of where you are in recording data tied to Meaningful Use achievement
- Scalability allows the system to grow with your practice

*At InfoQuest Systems, **we know our clients by name, not a number.***
